

Hang Time!

Cut out the two rectangles which will become the helicopters. Cut along the solid lines and fold along the dotted lines. Fold the shaded bottom area at the dotted line. Fold in flaps D and C so you have a narrow bottom area. Put a paper clip on the area for weight. Fold flaps A and B in opposite directions. The final helicopter will look rather like a flower. The “stem” is the holder (with the paper clip at the base) and the “petals” are the helicopter blades. Now, hold it high and let it drop. How long does it stay airborne?
